Viral Sachde

Forward Deployed / Solutions Engineer | Full Stack + AI

Ahmedabad, India · open to travel | vsachde74@gmail.com | +91 94849 91399 | Portfolio | GitHub | LinkedIn

SUMMARY

Mid-level full stack engineer (2.5+ years) with a solutions architect mindset. Works directly with clients to turn business problems into working systems: requirements, architecture, integrations, cloud deployment, go-live and user onboarding. Comfortable on-site, across multi-tenant platforms, AWS and AI features.

SKILLS

Languages and frameworks: TypeScript, Python, Rust, React, Next.js, Node.js, NestJS, FastAPI, Electron, Tauri

Data and auth: PostgreSQL (multi-tenant), MongoDB, Better Auth, JWT, RBAC

Cloud and DevOps: AWS (ECS Fargate, RDS, SQS/SNS, S3, CloudFront, WAF, ALB, VPC/VPN, IAM, CloudWatch, Lambda, Amplify), Pulumi, Docker, GitHub Actions, Linux

Integrations: API design (REST, GraphQL), webhooks, event-driven messaging (SQS/SNS), third-party SaaS and legacy system integration, data sync with retries and audit logs

AI: OpenAI, Claude and Gemini APIs, LangChain, RAG, LLM desktop apps

Client delivery: Requirements discovery, solution design, stakeholder alignment, production rollout, on-site enablement

EXPERIENCE

Alchemy Tech

Oct 2025 - Present

Mid-Level Full Stack Engineer, Ahmedabad

Port Community System

Platform where clearing agents, truckers, shipping agents, terminals, rail and customs share documents, approvals and payments.

- Spent 4 weeks on-site with the client: ran UAT and go-live trials, turned field issues into fixes, and onboarded users through workshops.
- Built the multi-tenant backend in NestJS with PostgreSQL on AWS RDS (single shared schema), serving 5 terminals and 7 participant types.
- Built a custom, schema-driven workflow engine in NestJS for approval-based processes with full audit history.
- Integrated 10 external systems used by terminals, customs and other agencies.
- Shipped end-to-end cargo flows: manifest ingest, gate in/out, carry-in/out, loading results, amendment history, bill payment settlement, OTP login via SMS and role-based access.
- Ran the platform on AWS, with infrastructure as code in Pulumi: ECS Fargate, RDS, SQS and SNS queues, S3, SES, CloudFront with WAF, ALB, Route 53, VPC with Site-to-Site VPN, IAM, Secrets Manager and CloudWatch.

WorkLog

Workforce time-tracking SaaS: an Electron desktop agent plus a Next.js web app.

- Built the first 3 versions of the Next.js web app, with a wide feature set, and deployed it on AWS Amplify.
- Made major changes across the product: multi-tenancy in the Electron app, full time tracking with reports, automatic Jira work logs and task moves.
- Contributed to the insights and reporting module (Jira sync coverage, app-level activity, 6-month trends) and the Keka and Slack integrations that sync leave, holidays and /worklog updates.

Investis Digital (IDX)

Jan 2025 - Oct 2025

Associate Software Engineer, Vadodara

- Worked with client teams to deliver 4+ client projects from development to production for enterprise brands including Vodafone and M&G, using Next.js, Vue.js, Sitecore and ASP.NETMVC.
- Built 7+ major site components, including a news centre, annual and quarterly results RSS feeds and a ticker.
- Built 2+ interactive map solutions end to end for real estate clients, plus 18+ server-side filters.

PMC Retail

Aug 2024 - Dec 2024

Software Engineer Intern (Angular / Node.js), Vadodara

Retail operations web app, on the MEAN stack with TypeScript and PostgreSQL.

- Built responsive Angular screens for inventory and order management, backed by Node.js APIs.
- Optimized PostgreSQL queries behind product and order listing pages.
- Added AWS Lambda jobs and S3 storage for product images and report exports, running on EC2.

PROJECTS

Unblurt Tauri 2, Rust, React, TypeScript, LLMs via opencode Website

Cross-platform desktop writing assistant with 500+ downloads: select text in any app, press one shortcut, and a rewrite (7 modes, 5 tones) is pasted back in place. Rust handles the hotkey, clipboard and keystrokes; any LLM provider runs through a local server; CI ships installers for macOS, Windows and Linux.

ClinicFront Next.js 15, TypeScript, Prisma, PostgreSQL, Claude, DeepSeek and Qwen APIs, WhatsApp, Instagram and Twilio APIs Live demo

Self-hosted clinic operating system, one private deployment per clinic: WhatsApp, Instagram, call and website enquiries land in one inbox where AI triages them, with CRM, appointments, records, prescriptions, UPI billing and reminders. Signed event outbox with retries; doctors sign every AI-drafted note.

Smoothflows Workflow engine, RBAC, PostgreSQL, REST API Live demo

No-code workflow platform: design stages, roles, forms and rules visually, then cases move on their own with notifications and a full audit trail. 13 built-in roles, client and partner access, and templates for purchasing, onboarding and approvals.

EDUCATION

B.Tech, Computer Science and Engineering 2021 - 2025

GSFC University, Vadodara
